Guide for the Application for the Foreign Students of Education Program for Global Advancement (EPGA) in Environmental, Energy and Health Science (Doctor Course)

2020

1. First application
   Examinations and Interview: June 26, 2020.
   Academic year start: October 1, 2020.

2. Second application
   Academic year start: October 1, 2020.

*This exam schedule is scheduled as of May 20. Depending on the future spread of coronavirus (COVID-19) infection, the entrance examination schedule may be postponed. If the test cannot be conducted at Saga University due to the spread of the new coronavirus (COVID-19), the test will be postponed and/or conducted via the Internet.

Graduate School of Science and Engineering
SAGA UNIVERSITY
Personal Information Use

In accordance with enforcement of the Act on the Protection of Personal Information Held by Independent Administrative Agencies, personal information written on the application form submitted by applicants is utilized for educational purpose (including exemption of entrance and tuition fees, payment extension of entrance fee, and scholarship) as well as the selection of applicants by entrance examinations (including additional business such as statistical transaction).

Personal information possessed by Saga University is not utilized for different purposes from the aim denoted above, and is not provided to a third person without the applicant’s agreement, except for the case prescribed by the item no.9 of the Act on the Protection of Personal Information Held by Independent Administrative Agencies.
Education Program for Global Advancement (EPGA) in Environmental, Energy and Health Science

(Doctor Course)

2020

- APPLICATION FORM (Enclosed Booklet)
The Education Program for Global Advancement (EPGA) in Environmental, Energy and Health Science provides all lectures, seminars, and internships, etc. on global environmental, energy problems and health expertise in English for both foreign and Japanese students. Students from overseas can learn and study completely in Japan without a hurdle of Japanese language. The EPGA is an educational course in the Graduate School of Science and Engineering, Saga University, that will start in October 2020, in order to bring up global researchers and engineers who will contribute to the environmental, energy and health science. This is a call for application to a three-year Doctor Course from the academic year of 2020.

The wisdom that mankind has created by the academic deepening has brought humanity a prosperous life through developing science and technology. To improve science and technology, it is necessary to spread health sciences in addition to efforts from the viewpoint of environmental and energy conservation. Educational study of the environmental, energy and health science should be performed from the all-round and global viewpoint. The EPGA has been established in the Graduate School of Science and Engineering in order to discuss and solve environmental, energy and health problems. The scope and goal of this EPGA is the education for students to possess an all-round insight for the environment, energy and health science from the global point of view after their completion by acquiring knowledge and thinking power.

In the Doctor Course program of the EPGA, education and research guidance of the fields are given in the Graduate School of Science and Engineering: Chemistry and Applied Chemistry, Mechanical Engineering, Electrical and Electronic Engineering, Civil Engineering and Architecture, and Advanced Technology Fusion. Applicants are encouraged to decide the research fields and prospective relevant supervisor(s) appearing on the List of Academic Staffs, and contact with the supervisor(s).

Students who complete the Doctor Course program of the EPGA are granted the Doctor’s Degree (Science, Engineering or Ph.D.). The month of entrance for foreign students is October, and they can enter the EPGA course immediately after completing their Master’s Degree program without learning Japanese language.

Qualifications
1. **Nationality:** Non-Japanese citizens staying in Japan can apply for this program.
2. **Academic carrier:** The following candidates may apply for admission.
   a. Those who have received Master’s Degree from Japanese University as of September 30, 2020.
   b. Those who have received a Degree equivalent to Master’s Degree of Japanese Universities in foreign country, or will receive it in foreign country as of September 30, 2020.
   c. Those who have received a Degree equivalent to Master’s Degree of Japanese Universities from a foreign school through correspondence education in Japan, or will receive the Degree as of September 30, 2020.
   d. Those who have received a Degree equivalent to Master’s Degree of Japanese Universities at educational institutions of the foreign country in Japan, which is designated by the Minister of Education, Culture, Sports, Science and Technology of the Japanese Government, or will receive the Degree as of September 30, 2020.
   e. Those who have been designated by the Minister of Education, Culture, Sports, Science and Technology of the Japanese Government.
   f. Those who are 24 years old or more as of September 30, 2020, and are admitted by the Graduate School of Saga University as that their academic abilities are equivalent to or higher than Master’s Degree of Japanese Universities upon reviewing the submitted materials.
   * Those who intend to apply based on the terms e or f should submit the application form to the Entrance Examination Office of Saga University one month earlier than the application deadline.
3. **Language proficiency:** A good working level of English is required.
Tuition expenses

1. **Entrance examination fee**: 30,000 yen. (N.B. The entrance examination fee is not necessary for the applicant who will graduate the Master Course from this University in September, 2020.)

2. **Entrance fee**: 282,000 yen.

3. **Tuition fee**: 267,900 Yen for each semester (scheduled). [535,800 Yen per academic year (scheduled).] Amount of due might be slightly revised depending on the decision of the administration council. Payments must be done for each semester biannually within the beginning two months of the semester. For the information on the tuition assistance, exemption subsidization, and scholarships is available at the Benefits section in the following pages.

Selection

1. Selection for admission shall be achieved by written and/or oral examinations on the selected major subjects and interview. All examinations and interview will be conducted in English on **June 26 and August 27, 2020**, for the first and second applications, respectively. This exam schedule is scheduled as of May 20. Depending on the future spread of coronavirus (COVID-19) infection, the entrance examination schedule may be postponed. If the test cannot be conducted at Saga University due to the spread of the new coronavirus (COVID-19), the test will be postponed and/or conducted via the Internet. In this case, the detail of entrance examination will be noticed to the applicant by e-mail and examination ticket.

2. The final results of selection will be noticed to the applicant by a letter. It will be dispatched on **July 14 and September 15, 2020** for the first and second applications, respectively.

3. A few students can be admitted.

Admission

1. Date of enrollment is October 1, 2020.

2. Date of registration for admission: September 23 to September 28, 2020. If the applicant does not register on these days, his/her admission shall be canceled.

3. Admission shall be canceled if the applicant fails to receive the Master's Degree on or before September 30, 2020.

Application

1. Applicants should prepare the following documents to be forwarded to the Entrance Examination Office, Saga University.
   ① **Application Form** (Form A).
   ② Official transcript of **Master's degree** or certificate representing that the applicant will be conferred Master's degree by September 30, 2020. Official transcript of Bachelor's degree is required in the case that the applicant will be qualified by the criterion 2-e of QUALIFICATIONS described above. The transcript or certificate must be sealed by the authority or sent directly from the college. Original diploma is also acceptable; in this case the examination office may exemplify the diploma and the original may be returned at the office.
   ③ Transcripts of **Academic Record** issued by university authorities and its English translation. (The criteria of academic assessment should be also shown.)
   ④ English summary of **Master Thesis** or it’s equivalent if available, not exceeding four sheets of A4 size paper typed in double space. If a Master Thesis is not required by the University from which the applicant graduated, prepare a statement to this matter.
   ⑤ **Certificate of Citizenship** issued by appropriate authorities.
   ⑥ **Recommendation and Reference**
      a. A letter of **Recommendation** (Form B) from the head (Dean, in case of University) of the applicant’s affiliated institution.
b. Letter(s) of Reference (Form C) from those who know the applicant’s research/study capability addressed to the President of Saga University.

The letters of recommendation and reference should indicate the English proficiency of the applicant. Enclose, therein, a certificate indicating the scores of TOEFL or a corresponding English Ability Test, if any.

⑦ Three Photographs (hatless portrait), 4.5 cm × 3.5 cm in size, taken within six months before the date of application. Two copies should be attached to the application form. One extra copy should be enclosed therein, with the applicant’s name and nationality on the reverse side of the copies.

⑧ Entrance Examination Fee: 30,000 yen.

2. All documents should be sent by registered mail and received by the Entrance Examination Office between

   June 1 and June 5, 2020 for the first application
   June 8 and July 10, 2020 for the second application.

Remarks
1. The above documents should be type-written in English on A4 size paper.
2. Incomplete documents are not acceptable.
3. None of the documents submitted is returned to the applicant.

Notes
1. The applicant will be deprived his/her entrance under the following cases:
   a. False statements on the documents.
   b. Violation of the pledge.
2. Applicants are recommended to be well acquainted with the Japanese language, culture, customs, etc. A knowledge of the Japanese language is necessary in daily life.
3. Applicants are expected to complete their Doctor Course Program within three years.

Benefits
1. Exemption of tuition fee from complete to 50% may be granted depending on circumstances.
2. There are several scholarships for private-expense foreign students. Students can apply for these scholarships.
3. Housing: Students can apply to Saga University International House, or low-cost apartments supported by Saga prefecture and other organizations.

Correspondence
Any correspondence relating to the application for the EPGA should be sent by mail to the address below.

MAJOR TEACHING AND RESEARCH FIELDS

Graduate School of Science and Engineering [Doctor course]

Course of Electronics and Information Systems

Chair of Electrical and Electronic Engineering

Electronics, Information and Communication

Advanced Microwave Engineering……..Toyoda, I., Tanaka,T. and Nishiyama, E.
Advanced Computational Engineering ………………………Itoh, H and Fukumoto, H.
Advanced Optoelectronics ………………………..Guo, Q.
Photoelectronic Materials and Devices…………………………..Tanaka, T.
Integrated Circuit Design …………………..Unsettled
Bionic and Cybernetic Engineering ……………………….Wakuya, H.
Photovoltaic System …………………..……………………….Hara, S.
Advanced Electronics Packaging Technology …………………..Sasaki, S.

Advanced Power Electronics

Power Electronic Devices and Materials…………………………..Kasu, M.
Microwave Electronic Devices and Circuits…………………………..Oishi, T.
Plasma Energy Engineering…………………………..Ohtsu, Y. and Ihara, S.
Surface and Interface Dynamics…………………………..Takahashi, K.
Wide-band-gap Materials and Devices ………………………….Unsettled

Course of Mechanical Engineering and Physical Science

Chair of Mechanical Engineering

Thermo-Fluid Energy Engineering

Thermal Engineering………………………………… Miyara, A., Mitsutake, Y. and Kariya, K.
Thermodynamics, energy conversion, power plant systems
Heat exchanger, condensation, evaporation, absorption
Fluid Engineering………………………………………. T., Kinoue, Y. and Shiomi, N.
Turbomachinery, compressible fluid flow, effective utilization of fluid energy,
multiphase flow

Material and Design Engineering

Mechanics of Materials, Solid and Structures …………. Hagihara, S., Hattori, N.,
Tadano, Y., Taketomi, S. and Morita, S.
Strength of materials
Advanced solid mechanics
Computational mechanics
Numerical analysis for structures
Fatigue strength of metals and advanced materials

Design and Production Engineering …………Zhang, B., Hasegawa, H. and Mawatari, T.
Design of machinery and machine elements
Tribology of machine elements
Surface engineering
Advanced Robotics ........................................... Tsujimura, T. and Izumi, K.
Sustainable robot design
Networked robot control systems
Meta-heuristics for robots

Control Engineering .................................................. Sato, K.
Control theory, robust control, adaptive control

Ocean Energy Engineering
Ocean Engineering .................................................... Imai, Y.
Wave energy conversion system, Marine hydrodynamics, Floating system

Thermal Engineering ..................................................... Arima, H.
Boiling heat transfer, two-phase flow, effective utilization of thermal energy

Thermal Energy Conversion Systems ........................... Ikegami, Y.
Ocean thermal energy conversion plant, development of thermal energy conversion system

Course of Environmental Science and Engineering
Chair of Chemistry and Applied Chemistry

Inorganic Materials Chemistry
Coordination Chemistry ........................................... Koikawa, M. and Yamada, Y.
Education and studies on synthesis, structure, and physical properties of metal complexes
Structural aspects of metal complexes
Basic coordination chemistry

Organic Materials Chemistry
Advanced Organic Chemistry ...................................... Unsettled
Transition metal-catalyzed organic synthesis
Chemistry of hypervalent iodine compounds

Advanced Organic Materials ........................................ Narita, T.
Education and studies on syntheses, structures and properties of polymers and functional organic materials
Polymeric material sciences
Structure of organic thin films

Advanced Biological Materials ................................. Hanamoto, T. and Osada S.
Organic fluorine chemistry.
Synthesis and structure of biologically active peptides.
Chemistry of ion channel forming peptides.
Mechanism-based design and synthesis of enzyme or receptor inhibitors.

Environmental Physical Chemistry
Physical Chemistry of Amphiphilic Materials ................. Unsettled
Self-organization of Amphiphiles
Polymer - Amphiphile Interactions

Physical Chemistry for Photonic and Optoelectronic Materials ........ Era, M.
Optoelectronic materials
Advanced Solid State Chemical Physics

Physical Chemistry for Biological Molecules .................... Unno, M.
Molecular Spectroscopy
Biophysics of Photoreceptor Proteins

Physical Chemistry of functionalized materials .......................... Sakaguchi, K.
Functionalized carbon materials
Fabrication and evaluation of organic devices

Physical Chemistry for bioelectrochemistry.............................. Tominaga, M.
Bioelectrochemistry
Bio-fuel cell

Environmental Chemistry and Engineering

Environmental Chemical Engineering ............................. Ohto, K. and Morisada, S.
Advanced environmental chemistry

Solution Chemistry .................................................. Takamuku, T.
Education and studies on structure and dynamics of liquids and solutions
Mixing state of binary solutions on nano-scale
Solvation structure of biomolecules in binary solutions
Physicochemical properties of room-temperature ionic liquids
Structure and dynamics of liquids confined in nano-space

Chair of Civil Engineering and Architecture

Civil Engineering

Geotechnical Engineering ............................................. Hino, T.
Theory and practice of geotechnical engineering prediction and prevention of ground disaster
Advanced geotechnical engineering
Advanced geo-environmental engineering
Geomechanics and rock engineering
Advanced soil mechanics

Structural Engineering ................................................... Obiya, H.
Advanced earthquake engineering
Theory of basic and application of large scale structure systems
Advanced structural analysis
System analysis of structures
Advanced structural design
Advanced computational mechanics

Construction Materials .................................................. Ito, Y.
Improvement of mechanical properties of construction materials
Utilization of waste materials
Advanced concrete engineering
Maintenance management of concrete structures
Development of inspection technique for concrete structure
Advanced geotechnical materials
Geotechnical materials engineering

Environmental System Engineering

Water Management System .............................................. Ohgushi, K., Yamanishi, H. Narumol, V. and Oshikawa, H.
Water resources engineering
Wastewater treatment systems
Computational hydraulics and remote sensing engineering for water environment
Water resources management
Water environmental systems engineering
Environmental systems engineering
Water pollution control systems
Advanced hydraulic network system planning
Planning theory on water environment

Urban System and Environment ........................................... Li, H., and Inohae, T.
Transportation system and planning.
Urban development and urban systems.
Residential environment evaluation.
Prevention for urban disaster.
Urban energy management.
Urban environmental evaluation.

Architecture and Urban Design

Urban Design and Architecture .............................. Mishima, N., Goto, R.,
Hirase, Y. and Miyahara, M.
Basic principle and application of urban planning and transportation planning
Advanced urban space design
Advanced transportation planning
Advanced environmental evaluation

Environmental Design for Architecture ............... Kojima, S. and Nakaokhubo, K.
Town space design
Advanced Architectural environmental control
Urban and Building Environment

Course of Advanced Technology Fusion

Chair of Advanced Technology Fusion

Biomedical Engineering

Intelligent Control Engineering ........................................... Goto, S. and Sugi, T.
Compensation of hand movement by additional force
Power system control; Reliability analysis of equipments in power stations,
Modeling and analysis of geothermal power station
Plant system control; Modeling and control of Ocean/Spring Thermal Energy
Conversion(OTEC/STEC), Modeling and control of chemical plant
Mechatronic system control; Simulator for articulated robot arm,
Cooperative control of plural robots, Forcefree control

Bioimaging and Sensing .......................... Kimoto, A. and Yamaoka, Y.
Biosensors; Intelligent-composite multisensors
Biosensors; Tactile sensors mimicking human perceptions
Biosensors; Non-invasive imaging with composite sensors
Biomedical imaging; Photoacoustic imaging
Biomedical imaging; Nonlinear optics

Applied Computing ......................................................... Muramatsu, K. and Dozono, H
Numerical analysis of electromagnetic field
Optimal design of electromagnetic apparatus
Modelling of magnetic materials
Soft computing
Self-organizing maps

Fluid Engineering ................................................. Matsuo, S., Hashimoto, T. and Sumi, T.
Compressible fluid flow, effective utilization of fluid energy, multiphase flow
Sensing Systems ................................................................. Teramoto, K.
  Non-destructive testing.
  Inverse problems in multidimensional sensing.
  Wave-field analysis
  Biomedical sensing by ultrasound
  Photonic Sensing.
  Nano-scale Sensing.
  Signal processing

Interface Devices ............................................................. Ueno, N.
  Mechanoluminescence Sensor
  Dynamic Imaging Analysis
  Human Interface

Biomedical Sensing .......................................................... Md. T. I. Khan
  Sensing systems of biomedical engineering dynamics

Advanced Material Chemistry

Functional Ceramics ......................................................... Akatsu, T. and Yada, M.
  Education and studies on structural and functional ceramics
  Advanced inorganic materials
  Preparation of ceramics: solid state reaction, sol-gel process, reactive infiltration
  Eco-friendly ceramics: luminescence materials for energy-saving, ceramic recycle
  and porous ceramics for environmental cleanup
  Nano-size functional ceramics: nano-fiber, nano-tube, nano-composites
  Ceramic composite

Advanced Organic Materials ................................................ Takeshita, M.
  Advanced supramolecular chemistry
  Molecular design of advanced materials

Environmental Chemical Engineering ...................................... Kawakita, H.
  Separation and removal material preparation of metals
  Modified saccharides and polysaccharides synthesis using enzymatic reaction

Photoreceptor proteins ....................................................... Fujisawa, T.
  Photosensing, energy production, and luminescence of proteins
  Vibrational spectroscopy
  Vibrational optical activity
Access to Honjo Campus, Saga University

INSTRUCTIONS (記入上の注意)
1. Application should be typewritten or written in Roman block capitals.
   (記入は楷書又は大文字のローマ字体を用いること。
2. Numbers should be written in Arabic figures.
   (数字は算用数字を用いること。)
3. Year should be written in the Anno Domini system.
   (年号はすべて西暦とすること。)
4. Proper nouns should be written in full and not be abbreviated.
   (固有名詞はすべて正式な名称とし、一切省略しないこと。)
5. An Examination fee of 30,000 Yen should be enclosed.
   (検定料30,000円を添えること。)
6. Write your name and the address within the box below for notifying the result
   of the selection. This box will be used for the addressing stickers.
   (合格通知書等を送付するので氏名と住所を下記欄に記入のこと。この欄は住所ラ
   ベルとして使用する。)

</table>
14. Accompanying Dependents (Provide the following information if you plan to bring any family members to Saga, Japan.) 同伴家族欄（佐賀に来る場合、同伴予定の家族がいる場合に記入すること。）

* He/She is advised to take into consideration various difficulties and the great expense that will be involved in finding living quarters. Therefore, those who wish to be accompanied by their families are advised to come alone first and let their dependents come after suitable accommodation has been found.

（注）家族用の宿舎をみつけることは相当困難であり賃貸料も非常に割高になるのであらかじめ承知されたい。このため、留学生はまず単身で佐賀に来て、適当な宿舎をみつけた後、家族を呼び寄せること。
