(High school subjects that applicants should study)

#### Child-child cooperation education course

You need to be able to learn a wide range of basic knowledge and be able to express your thoughts in an easy-to-understand written and verbal manner for all the subjects and subjects you will study in high school. In order to be active as a teacher in the future, it is necessary to cultivate motivation and interest in teaching, and to have a strong interest in issues related to early childhood education, primary education, and special needs education. If you have the opportunity to experience some kind of practice that will help you become a teacher in the future, such as volunteer activities and various activities inside and outside the school before entering university, we encourage you to actively pursue these opportunities.

In addition to the above, we welcome students who have a “self-directed attitude” that can activate the educational and research activities of this course by providing good stimulation to surrounding students through their own learning activities and activities.

#### Primary and secondary collaborative education course

You need to be able to learn a wide range of basic knowledge and be able to express your thoughts in an easy-to-understand manner in both writing and speaking, regardless of whether you study humanities and sciences, for all subjects and subjects to be taken in high school. In addition, for subjects whose skills are considered important, it is also necessary to acquire basic skills. In order to be active as a teacher in elementary and junior high schools in the future, it is necessary to have a broad perspective and strong interest in issues surrounding primary education and secondary education, and to think for yourself through reading. If you have the opportunity to experience some educational practices, such as volunteer activities and activities inside and outside the school before entering university, we encourage you to actively take on these opportunities.

In addition to the above, we welcome students who have a “self-directed attitude” that can activate the educational and research activities of this course by providing good stimulation to surrounding students through their own learning activities and activities.
