

Faculty of Economics

Desired

【Educational purpose and ability and aptitude necessary for learning after admission】

Curriculum Format	Ability and aptitude at the time of admission necessary to adapt to the curriculum
General Education Course	To acquire knowledge and concepts of a wide range of subjects and subjects to be taken at high school, in order to acquire a wide range of knowledge in fields other than social sciences, as well as culture and nature, modern society and life, and foreign language courses, you need basic English language skills to take (English).
Interface Subject	In order to acquire the ability to identify and solve problems while being conscious of “learning” in university and connection with modern society, not only an interest in contemporary tasks and events is required, but also group learning and presentation among students, including active behavior and learning attitude to actively carry out active learning.
Undergraduate Specialized Subjects	In addition to comprehensively studying the fields of economics, business administration, and law, you should gain knowledge of the specialized field of the department in which you are affiliated, and discover social and economic issues, and acquire the ability to utilize specialized knowledge toward those issues. In addition to the basic understanding of a wide range of subjects such as the Japanese language, geographical history, citizenship, mathematics, and English, which are taught in high school, the ability to read materials and information, and logically develop and express your thoughts is required. In addition, as foreign language subjects are placed to enhance information gathering and communication skills in specialized fields, basic English language learning skills are required to understand English language materials. Furthermore, in order to conduct small-group exercises from the first year, it is also important to have the ability to actively engage in discussions and to activate learning and research activities through communication with the surroundings.

The Faculty of Economics provides education and knowledge in social sciences, focusing on economics, business administration, and law, and analyzes the problems in economics and society, and aims to develop human resources who can solve them. Curriculum development to achieve that purpose, and the ability and aptitude at the time of admission necessary for that, and the approach of learning in high school etc. which applicants for admission should have are as follows.

⟨High school subjects that applicants should study⟩

Economics department

A wide range of basic knowledge is required to understand the problems that occur in the economy and society. Not only reading comprehension of sentences but also speaking ability to logically expand, describe, and organize your own ideas based on various knowledge and information. Economics also includes areas that require mathematical thinking. Therefore, it is important that you have sufficiently acquired high school textbook level knowledge. If you want to go on to a technical high school, you will need to acquire basic knowledge and skills such as commercial subjects as well as regular subjects. Furthermore, in today's world where international character is required, not only foreign languages, but also English, as well as a wide range of knowledge such as history and geography are needed to deepen understanding of the international economy and politics. You also

need to have an interest in social issues and the ability to collect information. It is useful to focus on social phenomena related to the economy, management, and law, and acquiring the ability and habit of using the library and the Internet etc. to voluntarily examine thematic topics of interest is for learning after admission.

In addition to the above, we welcome students who have an "independent learning attitude" who can activate the education and research activities of our department through their own learning activities and initiatives.

Management Department

A wide range of basic knowledge is required to understand corporate management and accounting. Not only reading comprehension of sentences but also speaking ability to logically expand, describe, and organize your own ideas based on various knowledge and information. Economics also includes areas that require mathematical thinking. Therefore, it is important that you have sufficiently acquired high school textbook level knowledge. If you want to go on to a technical high school, you will need to acquire basic knowledge and skills such as commercial subjects as well as regular subjects. Furthermore, in today's world where international character is required, not only foreign languages, but also English, as well as a wide range of knowledge such as history and geography are needed to deepen understanding of the international economy and politics. You also need to have an interest in social issues and the ability to collect information. It is useful to focus on social phenomena related to the economy, management, and law, and acquiring the ability and habit of using the library and the Internet etc. to voluntarily examine thematic topics of interest is for learning after admission.

In addition to the above, we welcome students who have an "independent learning attitude" who can activate the education and research activities of our department through their own learning activities and initiatives.

Economic Law Department

In order to understand the laws that are the norms of economy and society, it is necessary to have knowledge of economy, society, and even politics, as well as sufficient national language power, and for that purpose, extensive knowledge such as history and geography is also necessary. It will be important. In addition, it goes without saying that in today's world where international character is required, foreign languages, especially English, are important. Moreover, since this department requires a wide range of studies including economics and business administration, it requires knowledge of mathematics at textbook level in high school. You also need to have an interest in social issues and the ability to collect information. Focusing on social phenomena related to the economy, management, and law, it is useful to acquire the ability and habit of using the library and the Internet etc. to voluntarily examine themes that are of interest may also be useful for learning after admission.

In addition to the above, we welcome students who have a "self-directed attitude" that can activate the education and research activities of this department through their own learning activities and initiatives.
